

A Midwest company providing reliable, hand-built luxurious hot tubs at affordable prices.

Value Proposition

There are a lot of hot tub manufacturers in the world today, but there aren't very many that have over 55 years of hot tub manufacturing experience. With 55 years of experience comes a lot of long-term relationships with industry-leading suppliers for our spas. Our spas are built to run efficiently and withstand harsh cold climate conditions while giving you comfort and hydrotherapy wellness. We're a Midwest company that's here to provide reliable, hand-built luxurious hot tubs at affordable prices for families to enjoy for several years.

About Us

Rippling Water Hot Tubs™ originated in the heart of the Midwest, a region deeply ingrained with a love for water and its rejuvenating benefits. In this corner of the country, where summers tend to be shorter, families cherish their time near water, whether it's spent boating, water skiing, surfing, swimming in pools, or indulging in the soothing embrace of a hot tub, relishing its hydrotherapeutic massage.

Handcrafted for hydrotherapy, comfort, wellness, and reliability—all at prices that won't break the bank. With our strong Midwestern work ethic and decades of expertise, we deliver nothing short of the finest-built spas. While our spas may reach customers worldwide, they're always meticulously crafted right here in the heart of the Midwest.

To Your Good Health

Hydrotherapy consists of three main healing components; heat, buoyancy, and massage. Together, they create an exceptional experience that is both relaxing and healthy. Whether you are experiencing joint or muscle pain, have trouble sleeping, or are just plain stressed out, spending time in a Rippling Water Hot Tub™ can provide therapeutic benefits for just about everyone.

Year Round Fun

Hot tubs are designed to maintain the temperature you set them at and as a result your hot tub is always ready and waiting for you. While lowering the temperature on a Rippling Water Hot Tub™ helps beat summer heat, there are few moments in life that come close to the sheer pleasure of being surrounded by warm bubbling water on a crisp, cold night.

Reduce Stress, Headaches & More

A warm water massage stimulates the body to release endorphins that can significantly reduce stress, Rippling Water Hot Tubs™ hydrotherapy jets can dilate blood vessels to help prevent headaches. In addition, when it comes to falling asleep faster and getting a good night's sleep, the National Sleep Foundation clearly states that *“soaking in a hot tub before retiring to bed can ease the transition into a deeper sleep.”*

Relieve Muscle & Joint Pain

The use of hydrotherapy hot tubs by athletes has skyrocketed and Rippling Water Hot Tubs™ are now set to lead the way in offering these benefits to a broader audience. A popular sports magazine said it best: ***“Your skin and muscles loosen and relax from the increased blood circulation.”*** adding that, if muscles are injured: ***“A soak in a hot tub increases blood flow to the injured area, bringing nutrients to help repair the damage.”***

More Time With Family & Friends

A recent survey of swimming pool owners revealed that many only enjoy their pools a few dozen times a year and jetted bathtubs are also used infrequently! In contrast, a Rippling Water Hot Tub™ is easy to use and is designed to consistently maintain the water temperature set by the user. As a result, it's always ready and waiting to be used for fun and relaxation. 24 hours a day, 7 days a week, 365 days a year!

Enjoy Life in Complete Comfort

Exquisite curves and sleek lines distinguish the Rippling Water Hot Tubs™ Riverbank Collection from the ordinary. Crafted with meticulous attention to detail, the Riverbank Collection promises an unparalleled experience of comfort and quality that surpasses expectations. With over 55 years of dedicated refinement, each hot tub in our Riverbank Collection epitomizes our commitment to excellence. Immerse yourself in a realm of luxury within our ergonomically designed corner seat, complete with adjustable neck and shoulder massage jets, offering an experience unlike any other.

Our Rippling Water Hot Tubs™ Riverbank Collection boasts a wealth of features and effortless operation, all at an affordable price point.

FEATURES & OPTIONS

Soft Touch™ Controls

State-of-the-art digital electronic control with LCD temperature and filtration readout. All functions are located at your fingertips.

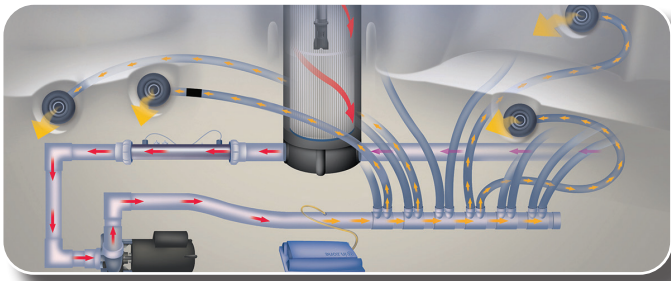

Sunset Lights Package

At the touch of a button, you can make your water dance with intense magenta, orange, green, blue, and violet - or just allow the system to gradually move from one beautiful color to another. Transform the mood as you enjoy dramatic dances of changing colors - a spectacular light show whether in or out of the water!

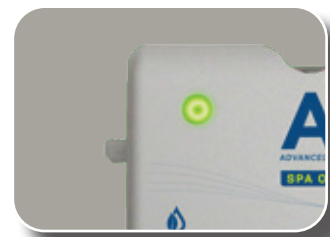

Filtration

Rippling Water Hot Tubs™ top-load filter systems allow for easy access to the filter cartridge for cleaning & replacement. Bulky filter canisters can take up precious hot tub space and also force the hot tub owner to drag a dirty filter sideways back through the spa, allowing filtered contaminants to reenter the water. A top-load filter allows for vertical removal of the cartridge filters element and also takes up less space.

Ozonator

All Rippling Water Hot Tubs can be equipped with the Del Ozone Natural Spa Sanitizing System. This system utilizes the latest ozone technology and injects ozone consisting of three oxygen atoms, directly into the spas plumbing system to kill bacteria in all water lines. The ozone sanitization is completely biodegradable and 100% natural with the only byproduct being oxygen.

Energy Saver System™

Heat is generated by the spa's power equipment inside the cabinet. This heated air is captured and returned to the spa's water. This continually helps maintain the water temperature without running the heater as often. The heat recovery system saves you money by reducing electrical costs.

Polar Insulation™

All Rippling Water Hot Tubs™ come with our double layer Polar Insulation System™. A thick layer of polystyrene foam and a heat reflective thermal-blanket on the wall and floor retain heat within the cabinet.

- * Synthetic weather guard™ cabinet
- * Thick layer of polystyrene foam between the frame and cabinet
- * Heat reflective thermal-blanket for maximum cabinet heat retention

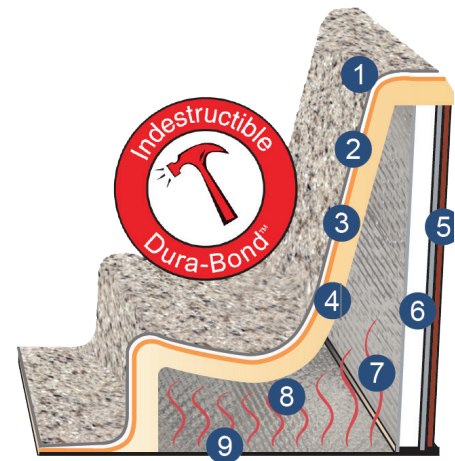

Durabond™

This four layer, patented strengthening process combines the beauty of Lucite Plus Acrylic™ with a layer of ABS for shell strength and integrity. Then a double strengthening material is applied. This high density material has all the strengthening properties of fiberglass without the environmental concerns.

SHELL STRENGTHENING SYSTEM

1. Acrylic Plus™
2. ABS
3. Dura-Bond™ with Foam Insulation
4. Polyethylene Foam
5. Classic Wood Frame
6. Polystyrene Insulation
7. Radiant Foil Insulation
8. Thermal Air Barrier
9. Moisture-Resistant Polyethylene Flooring

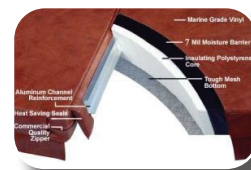

Maintenance-Free Weather Guard™ Cabinet

Our synthetic cabinets with reversible panels are known for their rich, beautiful appearance and long lasting durability. Fully removable access panels make service a breeze.

Energy Efficient Hard-Covers

Keep the heat in while keeping debris out with an original spa cover. Rippling Water Hot Tubs™ outfits quality lockable hard covers that perfectly fit your spa. Made with marine grade vinyl, 7 mil moisture barrier, insulating polystyrene core, Durable reinforced hinge, heat-saving seals and more.
